

**Indiana University  
Research Institute  
Indianapolis, Indiana**

The Research Institute at the Indiana University School of Medicine provides an environment that stimulates creative and collaborative research.

With four floors, a lower level and penthouse, components include the Stark Neurosciences Research Institute, the Walther Oncology Center, the Indiana Center of Excellence in Biomedical Imaging and the Indiana Center for Biological Microscopy. Laboratory space and supporting scientific space comprise nearly half of the building.

The building is the second component in a three building, 600,000 square feet research complex scheduled for completion in 2005.

Size:	120,000 gsf
Construction Cost:	\$21,000,000
Completion Date:	September 2003
